## Contents

---

1. Space-time coupling phenomena in EM pulses of finite energy in free space ..... 55-68  
*Esen A. Rakhmanov, Nikolay L. Popov  
Alexander V. Vinogradov*
2. Methane in greenhouse effect of the Earth's atmosphere ..... 69-78  
*B.M.Smirnov, D.A.Zhilyaev*
3. Effects of a Magnetic Field of the Arbitrary Strength on the Motion of a Rydberg  
Electron around a Polar Molecule ..... 79-87  
*E. Oks*
4. Scalar and Vector Perturbations Addition in the Framework of the Frequency Fluctuation Model ..... 89-101  
*Astapenko V.A, A. YU. Letunov and V.S. Lisitsa*
5. Neutron Ionization of Germanium ..... 103-106  
*M. S. Pindzola and J. P. Colgan*
6. Rydberg States of Muonic-Electronic Helium and Heliumlike Ions: The Role of ..... 107-113  
the Eccentricity of the Classical Orbits  
*N. Kryukov and E. Oks*
6. Explaining mind-boggling features of UFOs from the physical point of view ..... 115-117  
*E. Oks*

## *Call for Papers*

The IRAMP is a peer reviewed international journal, created at the beginning of 2010, that publishes high-quality review articles and also high-quality original research papers. **Topics of interest are all areas of Atomic, Molecular, and Optical (AMO) physics in the broadest sense.** They include not only fundamental fields of AMO physics, but also *applied areas*, such as, for example (but not limited to):

- atomic and molecular processes in plasmas and gases
- optical and beam-probe nanophysics
- plasma spectroscopy
- X-ray lasers
- astrophysical applications

A distinctive feature of IRAMP is publishing both *review articles and original research papers* and having a relatively large share of the review articles in the mix. The journal is published *semi-annually*.

**The publication is free of charge. There is no page limit.**

**A publication in the IRAMP creates a timely record of the authors results for a broad audience around the world - *without preventing the authors from submitting a modified/extended article elsewhere.***

**The authors learn about the acceptance of their papers within just 2 weeks from the submission.**

Each paper should be submitted electronically as 2 files (of the same content) simultaneously: a pdf-file and a source-file (such as a word-file or a LaTeX-file). The e-mail address for submissions is: [goks@physics.auburn.edu](mailto:goks@physics.auburn.edu)
