

**Purpose**

The purpose of this summary is to provide you with general information regarding your participation in the Auburn University supplemental retirement Plans; however, the summary details are general in nature and are not intended as investment, legal, or tax advice. You should always consult with an attorney, tax specialist or financial professional before making any legal, tax, or investment decision.

The Plans are available to help you save money for retirement. When making investment decisions there are many factors to consider, including but not limited to:

- When you plan to retire
- Your investment risk tolerance
- The impact of fees on your investments
- How this retirement plan fits into your overall financial goals

**Your Retirement Plan**

Your Plans offer a range of investment options available from Corebridge, Fidelity, Lincoln, and TIAA. Contributions are an important element of your retirement plan. You may specify how your contributions to the Plans are invested or make changes to existing investments in your plan. Investment changes are made by contacting a vendor representative, the vendor's call center, or through the Plan's web-site. Note that the cumulative effect of fees and expenses may substantially reduce the growth of your retirement savings. For more information on the long term impact of fees visit the Department of Labor's website. Fees and expenses are only two of many factors to consider as you make investment decisions.

Additional information can be found here: <https://www.dol.gov/sites/dolgov/files/ebsa/about-ebsa/our-activities/resource-center/publications/retirement-plan-fees-expenses.pdf>

## Disclosures

*The performance data provided above was obtained from Plan vendors and third parties. The performance since inception is cumulative if less than one year of performance history is shown. Vendors may have obtained this information from third parties. Neither the vendors, Auburn University, or Johnson Sterling, Inc. has independently verified the accuracy or completeness of this information.*

*Investment options, insurance, and annuity products are not FDIC insured. Your vendor may offer additional asset protection.*

*Past performance is no guarantee of future results. Your returns and the value of your investment will fluctuate over time. Current performance may be impacted by other factors including fees and expenses.*

## Footnotes

1 - Investment results are after applicable investment, administrative, and distribution expenses. Investment results for the vendors do not include the record keeping and administration expense.

2 - Total return includes the reinvestment of all dividends and any capital gains distribution.

3 - Expenses are estimated each year based on projected expense and asset levels. Differences between actual expenses and the estimate are adjusted quarterly and are reflected in current investment results. Historically, adjustments have been small. The Account's total annual expense deduction appears in the Account's prospectus (if available), and may be different than that shown herein. Please refer to the prospectus for further details.

4 - Benchmark information was provided by Morningstar, Inc. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

5 - TIAA mutual funds = You cannot transfer into the fund within 30 calendar days of transferring out of the fund.

6 - CREF annuities = If round trip is made within 60 calendar days, transfers into the same account will be restricted for 90 calendar days. The performance for R4 that is prior to the respective inception dates is based on the performance of the Account's Class R3.

7 - Corebridge trading policy = If sell \$5,000 or more, then you will not be able to purchase \$5,000 or more for 30 calendar days. This policy applies only to investor-initiated trades of \$5,000 or more. <https://www.Corebridgers.com/policies/investor-trading>

8 - Target Retirement Date Funds are actively managed. Their asset allocations are subject to change. They invest in many underlying funds and are exposed to the risks of different areas of the market. The higher a fund's allocation to stocks, the greater the risk. After the target date has been reached, some of these funds may be merged into a fund with a more stable asset allocation. Please consult the prospectus for more complete information.

9 - The performance shown for Classes R1, R2, and R4 that is prior to their respective inception dates is based on the performance of the Accounts' Class R3. The performance for Classes R1 and R2 for periods prior to their inception has not been restated to reflect the current expenses of Classes R1 and R2, which may be higher or lower than Class R3 for the same period. The performance for Class R4 for the periods prior to its inception has not been restated to reflect the lower expenses of Class R4. Class R3 is now considered the oldest share class for CREF, previously it was R1.

10 - The current rate more closely reflects the current earnings of the money market fund than does the total average annual return. Yields are historical and do not guarantee future performance.

11 - For TIAA Traditional the Current Rates, Minimum Guaranteed Rates and Fees (if applicable) shown for guaranteed annuities are the rates in effect as of the first day of the month following quarter end. Depending upon the contract, these may apply to new money only or to both new money and existing accumulations. See your annuity contract or certificate for details.

12 - The TIAA Traditional Annuity guarantees principal and a specified interest rate (based on TIAA's claims paying ability). It also offers the potential for greater growth through additional amounts, which may be declared on a year-by-year basis by the TIAA Board of Trustees. These additional amounts, when declared, remain in effect for the "declaration year" which begins each March 1. Additional amounts are not guaranteed. For more up to date information please visit your employer's microsite or TIAA.org. TIAA Traditional is a guaranteed insurance contract and not an investment for federal securities law purposes.

13 - Corebridge declares a portfolio interest rate monthly for the Fixed-Interest Option. That declared portfolio interest rate is guaranteed until the end of that month and is credited to all new and old deposits as well as credited interest. The contractual lifetime minimum guaranteed interest rate is 2%. All interest is compounded daily at the declared annual effective rate. Corebridge's interest-crediting policy is subject to change, but any changes will not reduce the current rate below the contractually guaranteed minimum or money already credited to the account. For the current crediting rate, please call 1-800-448-2542 or contact one of the Plan's Corebridge representatives listed above.

14 - Transfers to Lincoln may be restricted. If you are actively employed and have or never had an account at Lincoln, you may transfer money to Lincoln and open an account if necessary. If you had an account at Lincoln that was previously closed (\$0 balance), you will need to open an account and make contributions prior to the transfer. If you terminated employment and have an account at Lincoln with a balance, you can transfer money to Lincoln. If you terminated employment and had an account that was closed or never opened an account at Lincoln, you are not able to open an account and transfer money to the account.

15 - Participant transfers from TIAA Stable Value may not be made directly to competing funds. Auburn offers two competing funds (CREF money market and TIAA Real Estate Account).
